

STATIC METER
(MODEL: SCM-02)

Reliable on-the-spot measurement of static charges has been easier than with the portable SCM-01. Hand-held, yet highly accurate and low drift, the SCM-02 answers three basic questions:

- 1) Is static present and on what Surfaces, Materials or people ?
- 2) How much static?
- 3) What is the polarity of the Charge ?

The instrument is ideal for use in such static sensitive environment as electronic component production and assembly areas, clean rooms, computer, medical and R&D Laboratories, surgical rooms, medical device manufacturer, printing pres, packing and production lines, etc.

SPEFIFICATIONS:

Measurement Range	: +/- 10kV At 1 Inch
Measurement Accuracy	: +/- 10%
Indication	: 2 ½ Digit LCD Display
Test actuation	: Press TO read
Power supply	: 9 Volt Battery
Low battery	: warning at 7.0 volts
Calibration	: Recommended every 12 months
Dimensions	: 135 x 70 x 30mm
Weight	: 180 Gms
Warranty	: 12 Months
